COMPACTED OUTPUT **claude-opus-5** · [N] tokens Copy Open in new session

Session 1475f2db... · turns #17-#20 · compacted 2026-09-23

Context: project ai-usages on branch main, agent claude_code, model claude-opus-5.

- #17 asked how token-usage cost is measured.
- #18 and #20 are IDE-context events only – scripts/install-hooks.sh and apps/collector/src/server.ts were opened; neither carried a user request.
- #19 is the substantive turn: add CLAUSE.md, README.md, map.md, architecture.md and related files. It ran 35 commands and touched 8 files.

Session 1475f2db... · turns #17-#20 · compacted 2026-09-23

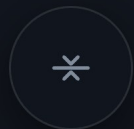

Context: project ai-usages on branch main, agent claude_code, model claude-opus-5.

1. #17 asked how token-usage cost is measured.

2. #18 and #20 are IDE-context events only – scripts/install-hooks.sh and apps/collector/src/server.ts were opened; neither carried a user request.

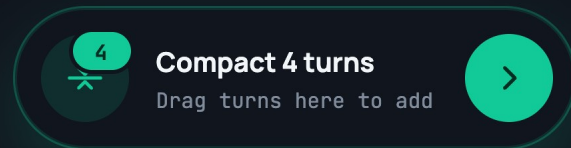

3. #19 is the substantive turn: add CLAUSE.md, README.md, map.md, architecture.md and related files. It ran 35 commands and touched 8 files.

COMPACT DOCK — STATES Drop target and entry point for the compact panel.

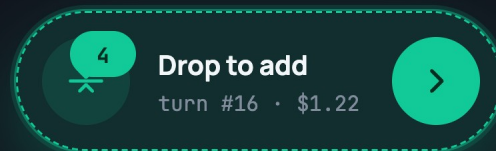

RESTING

No turns picked. A 60px circle, parked 30px from the bottom-right corner.

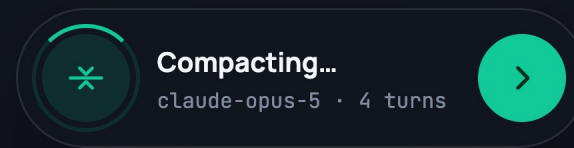

ARMED

Expands as soon as a row is checked. The badge counts the selection.

DRAG OVER

Dashed Signal ring while a row is held over it; the row drops in on release.

WORKING

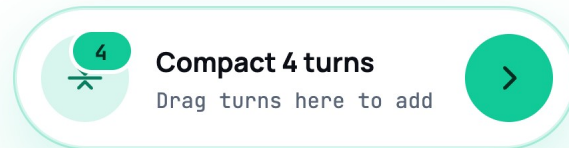

Ring spins while the model runs. Esc cancels and keeps the selection.
